

Plating Research & Development Centre

Interplex's Plating R&D Centre is a plating Centre of Excellence established in BioCity in central Scotland.

Interplex Plating R&D Centre

Our state-of-the-art equipment enables us to provide a wide range of laboratory testing services such as:

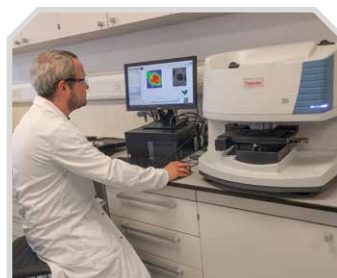

- Energy Dispersive X-ray (EDX) Analysis
- Environmental Testing
- Fourier-transform InfraRed Microscopy
- High Performance Liquid Chromatography (HPLC)
- High power, low power, measurements & macro inspection
- Inductively Coupled Plasma Optical Emission Spectroscopy (ICP-OES)
- Ion Chromatography
- Light Microscopy
- Micro-section Preparation
- Scanning Electron Microscopy (SEM)
- Wetting Balance Solderability Testing
- X-ray Diffraction

Ion Chromatography
